

Sif Eddine Benabida

Logistics Tracking Officer

+213 549 89 81 24 · benabidasifou@gmail.com · Bordj Bou Arréridj, Algeria
Portfolio: sifou-213.github.io · GitHub: github.com/Sifou-213

Profile

Holder of a master's degree in operations research (top of my class), I work as a logistics tracking officer at Condor Electronics. I analyse and optimise distribution operations, from trip planning to logistics execution. I am looking for a **Business Analyst** or **planning and scheduling** position, across the whole supply chain, from procurement to distribution. Curious and methodical, I like to understand what lies behind the numbers and to turn raw data into concrete decisions.

Professional experience

Logistics Tracking Officer — Spa Condor Electronics 2025 – 2026

- Operational and analytical monitoring of finished-goods distribution, from trip planning to logistics execution
- Analysis of results and key drivers in order to propose solutions that improve logistics performance
- Coordination with carriers and warehouses; shipment tracking in SAP SD and dashboards in Power BI

Final-year internship — Spa Condor Logistics 2024 – 2025

- Modelling and solving the 3D Bin Packing problem to optimise container loading, reduce the transport cost per item and limit damage caused by non-compliant loading

Education

Master's degree in Operations Research 2023 – 2025
El Bachir El Ibrahimi University of Bordj Bou Arréridj — ranked 1st in class

Bachelor's degree in Mathematics 2020 – 2023
El Bachir El Ibrahimi University of Bordj Bou Arréridj — ranked 2nd in class

Baccalaureate in Mathematics 2020
Belmihoub Abderahmen High School, Bordj Bou Arréridj

IT skills

Data and ERP	Microsoft Fabric (Power BI), SAP — Sales and Distribution module (SD)
Programming	Python, SQL, Matlab, Maple, Prolog, C
Office software	Word, Excel, PowerPoint, Outlook, Teams
Planning and tools	Microsoft Project (planning, Gantt charts), GPSS (simulation), LaTeX

Languages

Arabic	Native language
French	Advanced
English	Upper intermediate

Projects

Screenshots and details of each project on my portfolio: sifou-213.github.io

- **Supply chain performance Power BI report (personal project)** — analysis of the supply chain from procurement to delivery: 3 years of orders (2018–2020), star schema, revenue, fulfilment times, warehouse efficiency and sales performance — GitHub
- **Sales performance Power BI report (personal project)** — interactive report on the SuperStore dataset: cleaning and transformation in Power Query, star schema, DAX measures (sales, profit, margin, YoY growth, YTD), custom theme, app-style navigation and mobile layout — GitHub
- **Inventory and supply chain performance Power BI report (personal project)** — interactive report focused on profitability, on the DataCo dataset: cleaning in Power Query, snowflake schema, DAX measures (average shipping time, profit, margin, average discount, loss-making orders), custom theme and app-style navigation — GitHub
- **Final-year project (2025)** — truck loading optimisation: Python application integrating the real constraints of Condor Logistics — GitHub · Live solver
- **Multi-objective optimisation (2025)** — study of the mathematical norms L^1, L^2, L^∞
- **Nonlinear optimisation (2024)** — trust-region methods for unconstrained minimisation
- **Travelling salesman problem (2024)** — solved in Matlab with Branch and Bound
- **Educational visits (2024–2025)** — Condor Electronics factories; Cevital production units

Certifications

- **Power BI Data Analyst** — full Career Track, DataCamp — Certificate
