SIF EDDINE BENABIDA

Business Analyst · Supply Chain & Data

+213 549 89 81 24 · benabidasifou@gmail.com · Bordj Bou Arréridj, Algeria · Portfolio: sifou-213.github.io · GitHub: github.com/Sifou-213

PROFILE

Ranked first in my MSc in Operations Research, I am a Logistics Tracking Officer at Condor Electronics, analysing distribution flows with SAP SD and Power BI to explain performance gaps and propose concrete actions. I am looking for a **Business Analyst** role that turns modelling, data analysis and supply chain knowledge into business decisions.

Strengths: performance analysis (KPIs) · reporting and dashboards · data modelling · variance analysis · optimisation and decision support · supply chain and distribution

EXPERIENCE

Logistics Tracking Officer · Condor Electronics, Bordj Bou Arréridj, Algeria — 2025 – Present

- Track finished-goods distribution end to end, from trip planning to delivery.
- Analyse gaps between planned and actual operations and their root causes; propose improvement actions.
- Track shipments in SAP SD (Sales & Distribution) and report performance through Power BI dashboards.
- Coordinate with carriers and warehouses to secure deliveries.

Final-Year Intern · Condor Logistics, Algeria — 2024 – 2025

- Modelled truck loading as a 3D Bin Packing problem to lower cost per item and damage from non-compliant loads.
- Designed a layer-building hybrid genetic algorithm in Python with real constraints: 11 vehicle types, allowed box orientations.
- Delivered a web app (Flask, REST API) that computes load plans and displays them in 3D. → code

DATA PROJECTS · POWER BI

- **Logistics & supply chain performance**: 7,991 orders (2018–2020), star schema; analysis of revenue, fulfilment times, 3 warehouses and sales team performance. → GitHub
- **Inventory, profitability & delivery (DataCo)**: 62,550 orders, Power Query, snowflake schema, DAX measures (shipping days, margin, loss-making orders); revealed that 55% of deliveries were late. → GitHub
- **Sales performance (SuperStore)**: Power Query, star schema, DAX (margin, YoY growth, YTD), key influencers analysis, app-style navigation and mobile layout. → GitHub

EDUCATION

MSc in Operations Research · Ranked 1st in class — 2023 – 2025
El Bachir El Ibrahimi University, Bordj Bou Arréridj, Algeria
Projects: travelling salesman (Branch and Bound, Matlab) · nonlinear optimisation (trust-region methods) · multi-objective optimisation (L^1, L^2, L^∞ norms)

BSc in Mathematics · Ranked 2nd in class — 2020 – 2023
El Bachir El Ibrahimi University, Bordj Bou Arréridj, Algeria

SKILLS

Analytics & BI	Power BI (DAX, Power Query, star and snowflake modelling), Excel
Data & code	SQL, Python (NumPy, Flask), Matlab, C
ERP	SAP SD (Sales & Distribution)
Optimisation	Metaheuristics (genetic algorithms), Branch and Bound, simulation (GPSS)
Tools	Microsoft 365 (Word, PowerPoint, Outlook, Teams), Microsoft Project, LaTeX

CERTIFICATION

Power BI Data Analyst
Career Track, DataCamp → certificate

LANGUAGES

Arabic: native
French: advanced
English: upper intermediate

INTERESTS

Geopolitics, philosophy, music
